

IMPORTANT NOTES

- All chemicals must be added into the filter compartment of your spa with the jets running for 10 mins.

Start-Up & Refill Procedure

- Ensure that your drain cap(s) are in place.
- Fill the spa with water through the filter compartment. In hard water areas we recommend filling the spa with a Portable Water Softener (available at the store, please call for more details).
- Once filled turn the spa on by turning on the breaker(s) or plugging the spa in.
- Add two (2) tablespoons of Chlorine & Three (3) tablespoons of Spa Activator (Shock)
- Use the FreshWater 5-Way Test Strips (Follow directions below for how to read test strips)
- Add 2oz. of Stain & Scale Defense

How To Read Your FreshWater 5-Way Test Strips

After Each Use

- Add three (3) tablespoons of FreshWater Chlorine

Once A Week

- Add three (3) tablespoons of Chlorine & Three (3) tablespoons of Spa Activator (Shock).
- Use the FreshWater 5-Way Test Strips (Follow directions above for how to read test strips)
- Add 2oz. of Stain & Scale Defense

Every 2—4 Week - Every 2 Weeks if using 3 or more time per week

- Clean your filters with a garden hose

Every Four Months

- Drain & Refill your spa using the directions above for Start-Up and Refill
- Clean your filters with Filter Cleaner

Once A Year

- Before draining the spa, consider using a Spa Flush as per the directions on the label. This will clean all the plumbing in your spa.
